

# Take off with your Ribena Rocket

Rally your troops, roll up your sleeves and prepare to build your very own berry-tastic Ribena Rocket.

## Tools and rocket parts that you'll need:

1 litre empty Ribena bottle

Scissors

Thin card

Glue

Coloured pens/  
crayons/paint

Stickers, sequins,  
glitter or anything  
else you can get  
your hands on  
for decoration

★ Remember  
★ Adults are usually best  
at cutting out, so make  
sure you take that job.  
★

You don't have to be a rocket scientist to build a Ribena Rocket, just ready and raring to go. So, count down these simple steps until you reach berry blast-off!

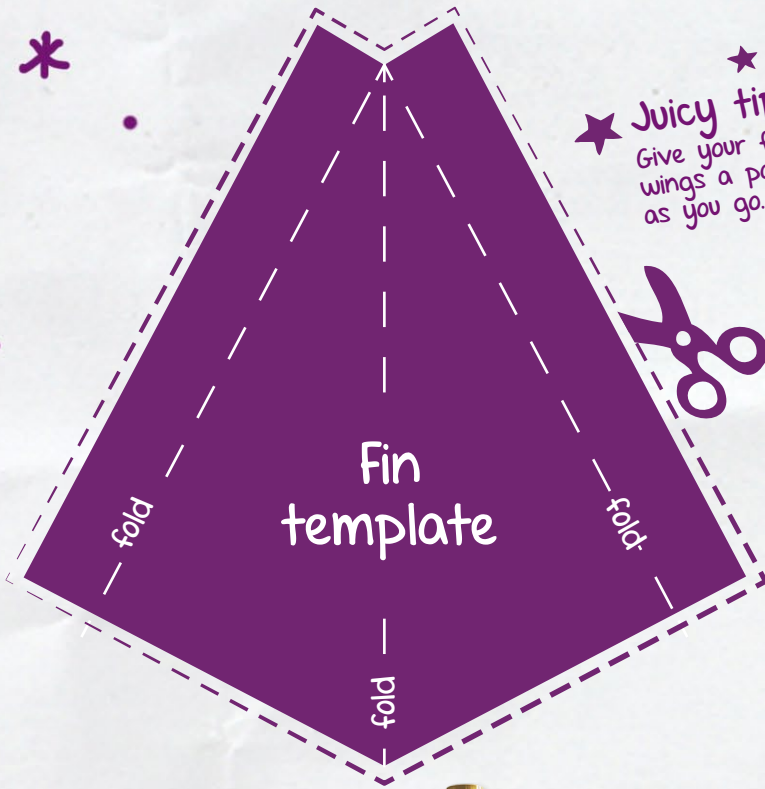

# 5.

First things first, get your 1 litre Ribena bottle and double-check it's empty. If it's all clear then give it a wash, so you're left with a clear plastic bottle.

# 4.

To make sure your rocket's super-steady for take-off, you need to build four strong fins. So, carefully cut out the fin template below and draw round it onto a piece of card. Do this four times, then cut them out, fold them like the ones shown and glue them into place like this.

★ Juicy tip  
Give your fins and wings a paint job as you go. ★

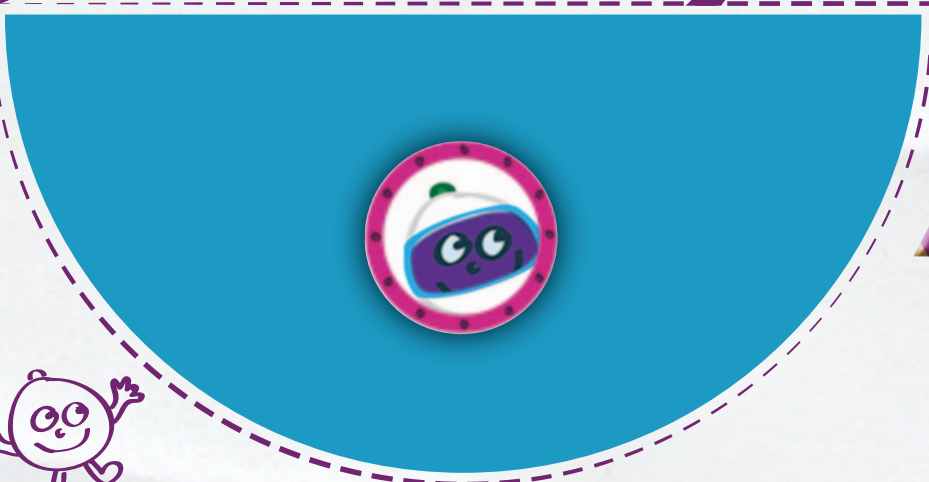

# 3.

Now for the wings. Just like you did for the fins, cut out the template, to the right, and draw round it to make two wings. Then stick them onto your rocket like the one above, this will give it extra speed when it's in the air.

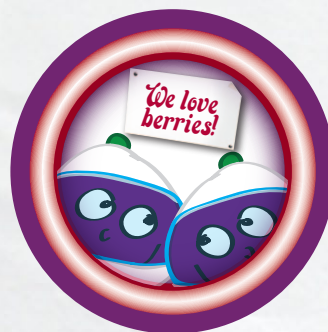

# 2.

Next, to make your rocket super-streamlined and really ready for the stars, you need to build the nose cone. Carefully cut out the template below, draw round it on a piece of card, cut it out and roll it into a cone. Then glue it into place like the one shown here.

# 3.

You're almost ready! Just the finishing touches to do, so grab your pens, stickers and sequins, and make your Ribena Rocket the most colourful, fruitilicious one the world (or space) has ever seen! Here are some ideas to get you started - or simply cut out these little guys and images, and stick them into position. Remember - the berrier the better!

*Now all that's left to do is...*

# Berry BLAST-OFF!

Next stop's  
the Moon!

Roarrrr!

Remember to take some snaps  
of your big Ribena Rocket launch  
and upload them at

[www.facebook.com/RibenaUK](http://www.facebook.com/RibenaUK)

*We'd be over the Moon to see them!*
